	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Create a game library (ArrayList) ● Add games ● Remove games ● Display the entire library ● Implement file format for loading/saving library on open/close	**Schedule - (For V2.0+)** ● Create a game object ● Add multiple games at once ● Game/Genre tags ● Status tags ● Hours played ● Have last played time ● Random sorting ● Randomly select a game ● Sorting by tag, playtime, last played, and name ● Searching for games based on substring ● Searching for games based on tag ● Add links to game (web page)
Not Important	**Delegate - (Use a library)** ● Write the library data to a file and read data on program start using Java PrintWriter and BufferedReader libraries ● Read commands from the terminal (standard input) using java.lang.IO library ● Prevent duplicate names with ArrayList.contains ● Use java.nio.file to create directory to store data	**Delete - (Cut it)** ● Highlight games with active sales ● Recommend new/old games based on recents ● Link program to Steam/other online library ● Custom GUI ● Notifications to remind to update library ● Random sorting while keeping recents at top
